

K Rishie

MERN Full Stack | Flutter Developer

rishiekandala@gmail.com | +91 8978667407 | DOB - 27 Feb, 2003

SKILLS

PROGRAMMING

Languages

- Advance: C++, Java
- Intermediate: C,
- Novice: JavaScript, Dart

Tools

- GIT • Linux • Windows

Frameworks

- React
- Vue

Technologies

- HTML • CSS
- SQL • MongoDB
- Flutter (Android Development)

OTHERS

- Public Speaking
- Exploring new technologies

EDUCATION

B. Tech, CSE

Sreyas Institute of Engineering
and Technology
2020-24
CGPA: 7.7

Intermediate, MPC

Sri Chaitanya Junior Kalasala
2018-20
Percentage: 90%

SSC

Dilsukhnagar Public School
2017-18
Percentage: 98%

LANGUAGES KNOWN

- English • Hindi • Telugu

EXPERIENCE

Web Synergies

Intern | Dec04 - May 31st | Hyderabad, India

FULL-STACK React JS | Node JS | SQL

Employee Management System

- Developed an Employee Management System, enhancing company operations.
- Utilized React.js for frontend development, improving user interactions.
- Established database connections using SQL, ensuring efficient data management.
- Designed user interfaces with Tailwind CSS and Bootstrap, boosting user engagement.
- Implemented Google OAuth for admin and employee login, ensuring secure authentication.
- Integrated email functionality, enhancing communication capabilities.
- Implemented OTP services for additional functionalities, improving security measures.

PROJECT(S)

HYPERLOCAL ECOMMERCE PLATFORM

React JS | Node JS | Expo | MongoDB | Express JS | Firebase | GraphQL

Problem: In the highly competitive e-commerce market, users often struggle to find the products they need quickly and easily, especially when they have only a broad idea of what they want to purchase. This challenge is compounded by the fact that users are not always familiar with specific brands or product details.

- Developed a web application using React.js for sellers to easily add and manage product listings.
- Added email functionality and OTP services to enhance communication and security.
- Integrated Amplitude to track user behavior and engagement, providing insights to optimize the platform for a better user experience.
- Built the backend using Node.js and Express.js to handle the server-side.
- Github Link: [hyper-commerce](#)

MERN ESTATE

React JS | Node JS | MongoDB | Express JS

Problem: In the real estate market, users frequently face difficulties in finding suitable apartments, buildings, and other properties quickly and easily. This challenge is heightened by the complexity of real estate options, as users often have only a broad idea of their requirements and may not be familiar with specific neighborhoods, property details, or market trends.

- Developed a web application using React.js for sellers to easily add and manage product listings. Added email functionality and OTP services to enhance communication and security.
- Integrated Amplitude to track user behavior and engagement, providing insights to optimize the platform for a better user experience. Built the backend using Node.js and Express.js to handle the server-side.
